

Directions:

1. Read the *Smithsonian* magazine article, "The Great Human Migration," which can be found here: <http://www.smithsonianmag.com/history/the-great-human-migration-13561/>
2. As you read, take notes or highlight every piece of information or clue given about human migration out of Africa.
3. After gathering all clues, break into groups to begin mapping the migration patterns of early humans.
4. Begin by labeling the following parts of the map:
 - Africa
 - Europe
 - Iberian Peninsula
 - Middle East
 - Israel
 - Turkey
 - Arabian Peninsula
 - Croatia
 - India
 - Asia
 - Indonesia
 - Papua New Guinea
 - Australia
 - North America
 - South America
 - Mediterranean Sea
 - Red Sea
 - Indian Ocean
5. As a group, compare all of your individual notes and clues you collected while reading the article to decide which pieces of information are important to the story of human migration.
6. Use the symbols provided in the map legend to draw the course of human migration as told in the article. On your map note evidence of:
 - Migration routes
 - Water crossings
 - Mountains
 - Evidence of human habitation, including *Homo sapiens* and Neanderthal areas of settlement
7. Lastly, label the migration routes with the approximate date ranges for when humans moved into these areas.
